DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-28, 31-38, 40, 42, 43, 45, 47, 48, 50, 52, 53, 55-58, 60-63, 65, 67, 68, 70-72, 74-77, 79, and 80 drawn to a composition, classified in class 514, subclass 210.01+.
 - II. Claims 29, 30, 39, 41, 44, 46, 49, 51, 54, 59, 64, 66, 69, 73, 78, and 81, drawn to a method of treating various disorders, such as diabetes, vascular disorders, etc. classified in class 514, subclass 210.01+.
2. Inventions group I and group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with a materially different product, such as insulin, or other well-known anti-diabetes agents.
3. Because these inventions are distinct for the reasons given above and have acquired a
separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1617

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Species Elections

5. Claims 1-81 are generic to a plurality of disclosed patentably distinct species comprising: a) bile acid sequestrants; b) sterol absorption inhibitors; c) the third agent listed in claims 8-27; d) diseases treated (if group II is elected). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of the four groups, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang, Ph.D. whose telephone number is (703) 308-4554. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.
